

EYA BEN DELLA

Technical Project Manager | Agile Project Delivery | Scrum Expert | Digital Transformation

Tunisia  eyabendanna@gmail.com  +21693367929  [eya ben della](#)

Technical Project Manager and experienced Full-Stack developer with over 4 years of delivering innovative and AI-driven IT solutions for multinational manufacturing and laboratory clients across Europe, Africa, Asia, and Latin America. Experienced in leading end-to-end project delivery, from requirements and solution design through implementation, deployment, and operational support. Strong track record of coordinating cross-functional teams, managing client and stakeholder relationships, driving change, resolving technical and operational issues, and ensuring delivery against project objectives. Fluent in French and English, with native Arabic and experience working across multicultural environments.

PROFESSIONAL EXPERIENCE

Technical Project Manager | BQUBE ITS

November 2025 - Present

- Lead the end-to-end implementation of 5+ complex MES solutions for global industrial clients, ensuring seamless execution from scoping through deployment and continuous optimization.
- Own technical delivery and acted as the primary technical interface between international clients, project management, development teams, and key stakeholders, ensuring alignment on scope, priorities, dependencies, risks, and delivery commitments.
- Lead and coordinate a technical team of 10+ members, allocating resources and responsibilities according to technical expertise, project priorities, workload, and delivery timelines while maintaining focus on project objectives
- Improve project delivery efficiency by up to 75% through structured task allocation, prioritization, technical coordination, dependency management, and proactive removal of delivery blockers.
- Reduce incident frequency by 55% by establishing a cross-client incident documentation and data-tracking workflow, enabling improved visibility into recurring issues, faster escalation, and more effective corrective actions.
- Orchestrate multi-project roadmaps, successfully balancing technical priorities, cross-functional dependencies, and risk mitigation to guarantee on-time delivery.
- Oversee SLA performance, production incidents, service commitments, and operational escalations, coordinating timely resolution while maintaining proactive communication with clients and internal stakeholders.
- Drive root-cause analysis and resolution of recurring technical and production issues, coordinating relevant technical teams and implementing corrective and preventive improvements to strengthen system reliability and operational efficiency.
- Design and implement KPI dashboards, automated reporting, and alerting mechanisms, providing management and project stakeholders with real-time visibility into delivery, service performance, incidents, and critical operational indicators.
- Spearhead communication between international clients and cross-functional teams, successfully managing project deployments across multicultural environments in 4+ languages (including English, French, Arabic and Spanish)
- Manage the transition from project delivery to production operations, coordinating deployment readiness, knowledge transfer, documentation, operational handover, stabilization, and post-delivery support to ensure business continuity.

Technical Lead / IT Full-Stack Developer | BQUBE ITS

June 2022 - October 2025

- Delivered and supported scalable LIMS and QMES applications for industrial clients across 5+ countries, in 4+ languages such as English, French, Arabic and Spanish.
- Provided technical leadership throughout the full application lifecycle, collaborating with project managers, clients, developers, and technical teams from requirements analysis and solution design through development, deployment, production support, and continuous improvement.
- Designed and developed REST APIs and system integrations, connecting business applications and operational systems to automate workflows, improve data exchange, and support real-time production monitoring.
- Designed and developed high-volume operational dashboards processing and visualizing 100,000+ daily production events and quality KPIs, enabling stakeholders to monitor production performance and identify operational issues.
- Led technical troubleshooting and production release activities, diagnosing complex application and integration issues, coordinating resolution across technical teams, and driving improvements to application stability and service reliability.
- Translated complex business and client requirements into technical solutions and implementation plans, defining technical priorities, coordinating development activities, and ensuring solutions were delivered within project constraints.
- Improved deployment efficiency by up to 70% through stronger technical planning, solution standardization, proactive issue resolution, and improved coordination between development and implementation teams.
- Provided technical guidance and knowledge sharing across development and implementation activities, helping teams resolve complex technical issues and maintain consistent development and delivery practices.

KEY PROJECTS

- **Pharmaceutical Manufacturing Digitalisation | PHARMAGREB Tunisia**
 - Leading the initial scoping and requirements phase of a digitalisation project for a major Tunisian pharmaceutical manufacturer, defining business objectives, operational requirements, and project scope.
 - Coordinating discussions with client stakeholders and technical teams to map existing processes, identify digitalisation opportunities, and establish implementation priorities.
- **Laboratory Management System (LIMS) | CTAA - GIZ Tunisia**
 - Lead the end-to-end delivery of a Laboratory Information Management System (LIMS) implementation, coordinating project scoping, requirements gathering, solution definition, development, testing, deployment, and operational support.
 - Own the technical coordination between project management, development teams, and client stakeholders, ensuring alignment on requirements, priorities, dependencies, and delivery milestones.
 - Design and coordinate automated reporting and notification workflows for operational KPIs, daily laboratory statistics, performance monitoring, and critical system alerts.
- **International QMES Deployments | AVO Mexico / India / France / China**
 - Managed QMES deployments across 4+ countries, coordinating international stakeholders, technical teams and deployment activities.
 - Coordinated multilingual environments across English, French, Spanish and Chinese, supporting production deployment, operational follow-up and post-delivery issue resolution and coordinating ERP/MES integration and production-related requirements.
- **Laboratory Management System (LIMS) | UNPA [L'Épi d'Or]**
 - Designed, developed and deployed a Laboratory Information Management System (LIMS),ensuring alignement of system architecture with end-to-end analytical workflows, ISO standards, and quality goals.
- **QMES Deployment | STIAL [Délice Danone]**
 - Led the digitalisation and automation of quality-control and production workflows for a major dairy manufacturing environment.
 - Coordinated the implementation of automated quality-control processes and daily production closure workflows, improving process consistency and operational visibility.
 - Coordinated solution validation and audit activities with international auditors, ensuring the automated workflows met operational, quality, and compliance requirements.
- **Production & Defect Tracking System | AVO SAME Tunisia**
 - Designed and developed in collaboration with the technical team a weight-based micro-part counting mechanism using real-time weight verification and feedback loops to improve production accuracy and process control.
 - Achieved a 75% reduction in scrap rates through improved real-time control, weight verification, and automated production monitoring.
 - Supported the integration of production data into defect-tracking and performance-monitoring workflows, improving operational visibility and decision-making.

TECHNICAL SKILLS

Front-End	JS, HTML5, CSS3, Bootstrap, DevExtreme, JQuery, AJAX, TypeScript, Angular, React, Responsive Web Design, Progressive Web Applications (PWA)
Back-End	PHP, TCPDF, REST APIs, API Integration, Java, Dynacase Platform, JSON, Python, Microservices, JWT authentication
Databases	PostgreSQL, MongoDB, SQL, Query Optimization, Data Modeling, Database Schema Design, Object-Relational Mapping (ORM)
Methodologies	Scrum, Waterfall, Kanban
Software Architecture	Microservices Architecture, REST API Design, System Integration , Software Architecture, IoT Data Integration, ERP/MES Integration, Event-Driven Systems
Project Management	Agile, SAFe, Jira, Notion, Confluence, GLPI, Slack, Microsoft Teams, Sprint Planning, Backlog Management, Risk Management, Stakeholder Management, Technical Documentation, Resource Planning
Project Planning & reporting	Grafana, GLPI, N8N, Microsoft Excel, Microsoft PowerPoint, Google Sheets, internal Project Planning and Reporting Tools.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science Engineering and Information Systems
Faculty of Sciences of Tunis, Tunisia | 2019 - 2022

Certifications and Trainings:

- **1 Million Prompters - AI Prompting Certification | 2026**
- **SAFe (Scaled Agile Framework) Training : PFI Consulting [2023]**
- **Scrum Coaching & Framework Implementation : PFI Consulting [2022]**

Leadership & Community Involvement :

- **AIESEC in Tunisia : Outgoing Global Talent Team Leader [2020 - 2022]**
- **WYSE 2.0 - Women & Youth Sustainable Employment (Tunis, Tunisia) : Talent Aqcuisation specialist and Recruiter [2026]**

LANGUAGES

Arabic (Native)- French (C1) - English (C1) - Spanish (Conversational)
